

myPayrazr Platform

myPayrazr® is an independent software platform supporting a complete portfolio of payment solutions offering customers a competitive advantage through simplification of the billing and receivables process. Built on .NET framework, our software-as-a-service offering (SaaS) delivers industry-leading technology, proven integrations, and a feature-rich yet simple-to-navigate user interface, all delivered through a high availability managed infrastructure with redundant failover dependability that is built with software and infrastructure extensibility in mind.

- Innovative & reliable
- Unique combination of performance and usability
- Dynamic code base for adapting future enhancements
- Comprehensive software quality assurance
- PCI, SSAE-16 & HIPAA certified

The myPayrazr Product Suite Includes:

myPayrazr Gateway® | myPayrazr VT® | myPayrazr Portal® | myPayrazr IVR®

myPayrazr® Gateway offers the flexibility, integrations and reporting required to succeed in today's economy. myPayrazr® Gateway is the most innovative, intuitive and flexible integrated ACH/Debit/Credit card payment processing gateway on the market today.

myPayrazr® VT (virtual terminal) is a web alternative to physical credit card terminal or Point-of-sale (POS) machines. It's a software application hosted online and can be accessed from any internet connected web browser.

myPayrazr® Portal enables businesses to securely accept consumer credit, debit, eCheck or ACH payments online, and can present invoices, manage customer accounts and archive payment history.

myPayrazr® IVR (interactive voice response) is a solution that allows callers to interact with an automated telephone payment system to make ACH, debit and credit card payments 24/7. myPayrazr® IVR can be accessed via a toll-free number or routed from an existing telephone system.
